PRESS RELEASE

Subject: Falmouth Beach Department

August 7, 2020

At 3:19PM this afternoon, I received confirmation of a single, additional positive coronavirus test result from a Falmouth lifeguard. This lifeguard has not been working from date that the test was administered on August 4 and will remain quarantined as per CDC guidelines. The total number of positive test results from Falmouth lifeguards is now eleven, which includes the ten lifeguards previously reported. We continue to encourage all Falmouth Beach staff members to test or re-test through the free testing process which we have arranged with the cooperation of Cape Cod Health Care.

Julian M. Suso

Falmouth, MA Town Manager
