

ACKNOWLEDGEMENTS

This Draft Comprehensive Wastewater Management Plan and Draft Environmental Impact Report was produced through the joint efforts of Stearns & Wheler and the Town of Falmouth. Stearns & Wheler appreciates the assistance and valuable contributions made by the staff of the Town of Falmouth Department of Public Works, Utilities Division, Engineering Division, Wastewater Treatment Facility, Planning Department, Health Department, Natural Resources Department, Falmouth Country Club Site, and Data Processing Department. We would like to acknowledge the following individuals and groups who contributed to this report and study:

Ray Jack, Jerry Potamis, and Amy Lowell of the Department of Public Works, who answered many questions and provided background and direction on the Town's water and wastewater system.

Charlie Pires of the Falmouth Wastewater Treatment Facility, who provided insight, operations data, and WWTF operational information.

Brian Currie of the Planning Department, who provided mapping, reports on previous planning efforts, and insight into future conditions in the Town and the planning areas.

David Carignan of the Health Department, who provided background and insight on wastewater-related health problems in the Town and the planning areas.

Robert Shea of the Data Processing Group, who provided GIS data and assistance.

William Chapman of the Water Utilities Department, who provided water consumption data, and assistance conducting the hydraulic load test and subsurface investigations at several potential treated water recharge sites in Town.

Falmouth Nutrient Management Working Group

Falmouth CWMP Technical Advisory Group

We would also like to acknowledge the following agencies and groups that provided valuable data and insight for this report and study:

University of Massachusetts at Dartmouth, SMAST

Cape Cod Commission

United States Geologic Survey

Massachusetts Department of Environmental Protection

Rose Forbes, Jon Davis, and Mike Minor of AFCEE/MMR
